# Outer planet moon - magnetosphere interaction workshop

## Thursday, 5 November 2020

**Poster session: Poster teaser 1 (19:30 - 19:46)**

| time | [id] title | presenter |
|---|---|---|
| 19:30 | [80] Variability in the energetic electron bombardment of Ganymede | LIUZZO, Lucas |
| 19:32 | [88] Ganymede Book | VOLWERK, Martin |
| 19:34 | [90] Energetic proton depletions near Europa: the effect of plumes, atmospheric charge exchange, Alfvén wings and the wake | HUYBRIGHS, Hans |
| 19:36 | [94] Survey of the Nançay Decameter Array's extended catalog for the possible control of Jupiter's decametric radio emissions by Europa. | PEIXOTO JÁCOME, Hadassa Raquel |
| 19:38 | [96] Simulations of UV Emission from the Io Plasma Torus using the Colorado Io Torus Emission Package 2 (CITEP 2) | NERNEY, Edward |
| 19:40 | [97] Io’s Loss of Neutral Material: Numerical Simulations | DOLS, Vincent |
| 19:42 | [98] Spectroscopic observations of Io Neutral Clouds: constraints on Na-bearing dust grains ejected from Io | GRAVA, Cesare |
| 19:44 | [99] An Alfvénic source for suprathermal electrons in the Io torus | COFFIN, Drew |

**Poster session: Poster breakout (19:46 - 20:30)**
