

## ***FDIR Working Group***

*by Mr. Alvaro Martinez Barrio (ESA/ESTEC) & Mr. Murray Kerr (DEIMOS)*

Fault, Detection, isolation, Recovery has been subject to many issues in ESA reviews. There is no common vocabulary, no identified specific process and no agreed set of output. In order to establish FDIR as a discipline, and to agree on a common customers-suppliers approach, the FDIR working group aims at producing a handbook. The progress of the group and the main results will be presented.
