

## ***Next Generation Terma Star Tracker, Recent and Future Developments***

*by Mr. Peter Hoffmeyer (Terma A/S)*

Terma will present the status of the next generation APS star tracker developed with support from ESA through the studies “2’nd generation APS STR – optical head” and “Miniature APS based star tracker engineering qualification model development”. The activities associated with the recent ESA contract “Star tracker based on Faint Star pre-development for Telecoms ARTES” will also be outlined.
