

Outer planet moon - magnetosphere interaction workshop

Thursday, 5 November 2020

Poster session: Poster teaser 1 (19:30 - 19:46)

time	[id] title	presenter
19:30	[80] Variability in the energetic electron bombardment of Ganymede	LIUZZO, Lucas
19:32	[88] Ganymede Book	VOLWERK, Martin
19:34	[90] Energetic proton depletions near Europa: the effect of plumes, atmospheric charge exchange, Alfvén wings and the wake	HUYBRIGHS, Hans
19:36	[94] Survey of the Nançay Decameter Array's extended catalog for the possible control of Jupiter's decametric radio emissions by Europa.	PEIXOTO JÁCOME, Hadassa Raquel
19:38	[96] Simulations of UV Emission from the Io Plasma Torus using the Colorado Io Torus Emission Package 2 (CITEP 2)	NERNEY, Edward
19:40	[97] Io's Loss of Neutral Material: Numerical Simulations	DOLS, Vincent
19:42	[98] Spectroscopic observations of Io Neutral Clouds: constraints on Na-bearing dust grains ejected from Io	GRAVA, Cesare
19:44	[99] An Alfvénic source for suprathermal electrons in the Io torus	COFFIN, Drew

Poster session: Poster breakout (19:46 - 20:30)
