

# **SAVOIR - Onboard Mass Memory Day**

**Friday, 14 February 2014 - Friday, 14 February 2014**

**ESTEC**

## **Programme**

Session 1: Ground and Space Segment Requirements for file based operations

- ADCSS 2012 conclusions and SAVOIR mass memory requirements
- Ground segment vs. space segment interface requirements in a file based operations scenario

Session 2: Protocols and onboard services

- Onboard interface, filesystem services and protocols,
- Highlights of the CFDP/PUS standard updates

Session 3: File Based Mass Memories - Developments and Lessons Learned

- CFDP test and simulation implementations
- Planned ESA mass memory activities
- Round table topics; Lessons Learned on SSMM ops, Packet Store vs. File based mass memories, SSMM file system considerations etc.
