

# 8th International Workshop on Retrieval of Bio- & Geo-physical Parameters from SAR Data for Land Applications

## Wednesday, November 15, 2023

### Forestry I: Modelling and Retrieval (9:20 AM - 10:40 AM)

-Conveners: Marco Lavallo; Carlos López-Martínez

time	[id] title	presenter
9:20 AM	[83] Quantifying forest aboveground biomass globally with spaceborne SAR datasets: the CCI Biomass CORE algorithm	SANTORO, Maurizio
9:40 AM	[88] Combining Multi-Mission Datasets and Structure Measurements to Estimate Tropical Forest Biomass in the Scope of the ESA BIOMASS Mission	HARTWEG, Benedikt
10:00 AM	[112] Estimating the properties of tropical dryland forests with ALOS L-band polarimetric data	QUEGAN, Shaun
10:20 AM	[109] Insights of MIPERS-4D simulations for the retrieval of forest height and biomass: study cases related to the BIOMASS mission	VILLARD, Ludovic
