

## ***SOIS Evaluation by the Primes***

*Presenter: Felice Torelli (ESA)*

In the frame of the GSTP program 3 parallel activities have been initiated with Airbus DS (France), OHB Systems (Germany) and Thales Alenia Space (France).

The objective of these activities is to review the existing CCSDS SOIS standard, to implement a subset of the specified services and to integrate them in the related proprietary FSW architectures.

The presentation will summarize the findings and recommendations resulting from the initial review of the SOIS standard by the involved Primes.

The same recommendation will also be feedback to the SOIS working group at the upcoming CCSDS fall meeting in November.
