AIRBUS

Open Source Strategy within AIRBUS aircraft

Software products today – a matter of Intellectual Property

Benefits of using Open Source for a company like AIRBUS group?

- Improve productivity
 - Do not re-develop the wheel again and again!
 - Focus on our added value for our customers, not on the platform
 - Reach more quickly high levels of maturity
- Enrich technical offer
 - By integrating tricky or expansive features into our products
- Improve interoperability thanks to reference implementations

What are the impacts of using Open Source on a company like AIRBUS group?

- Needs to adapt the System / software development processes
 - Component portfolio management
 - Intellectual Property control
 - Architects and developers trainings
 - Export control
 - Security
 - Liability
 - Supply chain
 - Very long term maintenance and availability
 - Qualification / Certification strategies

A shared effort of AIRBUS group Business Units

- A core team of a dozen of people across all BUs in all countries
 - Started in 2012 and coordinated by the Chief Technical Office of AIRBUS group
 - Scheduled in 3 stages:
 - Initial evaluation in 2012: identify problematics, select a supporting tool and impacted processes.
 - Pilot stage in 2013: testing and refining the new activities, organizations and tools.
 - Industrialization in 2014: trainings, methods and tools deployment, continuous synergy between BUs.

COTSAQ – COTS Management Tool

Project created in PolarSys in October 2014, initial contribution in progress

Contributing back to Open Source communities?

- Keeping your patches private is expensive
- Contributing doesn't mean necessarily patches
- Contributing adds value to the open source components you use
- Addressing common weakness of system / software engineering tools
 - Interoperability – Data / Model / Tool
 - Vendor commercial strategy
 - Obsolescence
 - Maintainability
 - Open innovation platform
 - Licensing and deployment in extended enterprise

From TOPCASED to PolarSys

- TOPCASED – Open Source Toolkit for critical systems...

- ... is migrating to a community tailored for embedded systems industries
