The 8th ESA Workshop on Avionics, Data, Control and Software Systems (ADCSS 2014) covers topics related to avionics for space applications, in the form of a set of round tables. The workshop acts as a forum for the presentation of position papers followed by discussion and interaction between ESA and Industry and between participants. Each theme part of ADCSS workshops will be first introduced and then expanded by presentations on related developments from technical and programmatic points of view. A round table discussion may follow, concluded by a synthesis outlining further actions and

All material presented at the workshop must be cleared of any restrictions preventing it from being published on the ADCSS web-site.
