SAVOIR Dissemination

Documents circulation

1. Documents are drafted and matured by SAG and ESA

2. Public Review:
   - the public review of SAVOIR documents are limited to member states
   - the public review will be done using the ECSS system

3. After public review documents are updated and approved
   - the approved SAVOIR documents will be available also outside the ESA member states, with traced distribution:
   - to be registered, a verifiable e-mail address of a valid company is required (excluding gmail, yahoo, etc.)
   - the approved SAVOIR documents are distributed via the ESA SAVOIR Document & Open Source Software repository (to be presented tomorrow)

Documents labels

- Security level:

  "ESA UNCLASSIFIED – FOR OFFICIAL USE"

- Copyright mention:

  "Copyright: 2014 © by the European Space Agency"

- the documents include a disclaimer:

Disclaimer

ESA does not provide any warranty whatsoever, whether expressed, implied, or statutory, including, but not limited to, any warranty of merchantability or fitness for a particular purpose or any warranty that the contents of the item are error-free. In no respect should ESA incur any liability for any damages, including, but not limited to, direct, indirect, special, or consequential damages arising out of, resulting from, or in any way connected to the use of this document, whether or not based upon warranty, business agreement, tort, or otherwise; whether or not injury was sustained by persons or property or otherwise; and whether or not loss was sustained from, or arose out of, the results of, the item, or any services that may be provided by ESA.

Documents usage policy (1/2)

The European Space Agency, on behalf of the participating Member States, holds copyright for all SAVOIR documents.

- No SAVOIR document may be reproduced in any form without the explicit consent of ESA.
  However, this consent is granted to organizations of **ESA member states** for their own use and for their contractors and subcontractors.

Documents usage policy (2/2)

General recommendation:

- quote SAVOIR documents rather than rewrite requirements.
- If modified, identify & trace modifications
- acknowledge SAVOIR copyright , clearly identify the document together with exact reference/version.

In ESA projects, SAVOIR docs will be part of project specifications:

- SAVOIR documents are intended to become Applicable Documents in ITTs, after a potential tailoring
- The tailoring shall provide the reasons of the modifications or the non application of requirements.
- This will allow to update the documents and adapt them to effective needs.
- Availability of a DOORS database is planned for SAVOIR documents

Review process

- Agreement with Eurospace & ECSS has been reached to use their infrastructure for the public review.

- The public review follows the ECSS scheme for such reviews

- First batch ready for public review is (Nov-2014)

    1) SAVOIR Reference Functional Architecture

    2) SAVOIR generic OBC Spec

    3) Flight Computer Initialisation Sequence (Sw Spec)

- A second batch of doc's are ready for an internal review – and should go for public review Q1-2015

    - RTU front-end spec

    - Software reference architecture

    - Component model

    - Execution platform
