

Session Program

3-5 Feb 2026

ESA Space Weather Service Network Workshop 2026

Preparing for the Vigil Mission and Future Observations

ESOC
Robert-Bosch-Strasse 5, 64293 Darmstadt, Germany

Wednesday 4 February

09:30

Preparing for the Vigil Mission and Future Observations

Session | Location: ESOC, VIGIL room (HIV-HV-HVI)

09:30-09:35 **Welcome and Introduction**

Speakers

DE PATOUL, Judith, WEST, Matthew

09:35-09:50 **Vigil Mission Overview and Role of L5 Observations**

Speaker

WEST, Matthew

09:50-10:05 **Use of L5 Data in CME Propagation Models**

Speaker

PERRY, Chris

10:05-10:20

Simulating high-speed solar wind streams from coronal holes using an L5-L1 configuration of Lagrangian points

Speaker

TEMMER, Manuela

10:20-10:30 **Using solar indicators to assess likely CME occurrence**

Speaker

GREEN, L.

10:30-10:40

Improved active regions tracking and flare forecasting through Synergy between VIGIL and integrated solar ground and space based observations

Speaker

LEFEVRE, Laure

10:40-10:50

From EUI to JEDI: Why EUV observations away from the Sun-Earth line matter

Speaker

DORSCH, Brenda

10:50-11:00 **General Discussion**

11:00
