

SEESP

Workshop on Simulation and EGSE for Space Programmes
25-27 September 2012
ESTEC / Noordwijk

- The **papers and the presentations** will become online at the SESP website within the next two weeks
- **List of participants** available in paper form at the registration desk
- Summary **report** will be compiled and provided on the website
- Please fill the **feedback form** provided and don't hesitate to make suggestions for improvements of future SESP

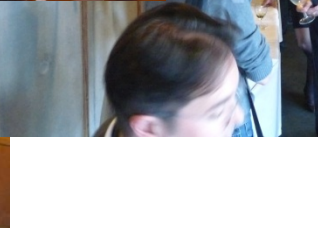

- 184 registered participants
 - all continents except Australia and Antarctica
- 10 exhibitors
- 74 submissions
- 33 presentations (no no-shows !)
- 10 posters
- 124 people at conference diner (no stats on the bottle of wines 😊)

- Average number of questions per session: 3.1415

- We met the objective set out to address the areas of
 - Modelling and Simulation
 - EGSE
 - Data repositories
 - Standards
- We achieved the purpose of
 - Getting views on needs and solutions for the future
- Our ambition
 - Bringing the state-of-art into the state-of practice

- Emergence of
 - Product-line Orientation
 - Frameworks
 - Re-use, linked to Maturing Use of Standards
- However
 - Still only limited Interoperability
 - Requirement to Focus on Interfaces and Protocols
- On-going Challenge of Knowledge Management across Technical Generations

Impressions

Special Thanks to

- Programme Committee
- Authors and Presenters
- Session Chairs
- Exhibitors
- Audience
- Organiser: Jose Pizarro and Kathleen Gerlo
- Conference Bureau Support

**Have a safe trip home, so that we can see you again at
the next **SESP in 2014 !****
